

Foundations of Practice

*Community Development
Core Competencies for
Extension Professionals in
the North Central Region*

Foundations of Practice

SLIDE

2

The Foundations of Practice: Community Development Core Competencies for Extension Professionals is composed of three major components:

- Understanding Communities and their Dynamics
- Developing Successful Community Initiatives
- Areas of Specialization and Emphasis

Component 1

SLIDE

3

The first component, Understanding Communities and their Dynamics, is a series of seven core competencies that focus on:

- The ability to understand community of place.
- The nature of public issues.
- The dynamics and interdependencies of the various segments of the community.
- The basics of community development work.

Learning Objectives

SLIDE

7

- Understand the importance of place/ landscape to community and vice versa
- Understand the causes of controversy around natural resource issues
- Understand the meaning of sustainable development
- Understand the interdependency between natural resources and other community resources

Foundations
of
Practice

Community Development
Core Competencies
for Extension
Professionals in the
North Central Region

Learning Objectives

SLIDE

8

- Understand the importance of how natural resource issues are framed
- Understand sustainable community development as a strategy to address natural resource issues
- Understand how natural resource issues are people problems first and foremost

Natural Resources & Our Community

SLIDE

9

How do you think about your community? How do you describe your community to others?

Foundations
of
Practice

Community Development

Community Identity

SLIDE 10

Natural resources and the landscape relate to our identity of the community. The physical setting helps to create the many characteristics that are unique to the community.

Community & Environment

SLIDE 11

“The community as a whole interacts with the local environment, molding the landscape within which it rests and in turn molded by it.”

Chris Maser, 1999, p. 28

Natural Resource Issues

SLIDE 14

Many of the natural resource issues are controversial. What makes these issues controversial?

Foundations
of
Practice

Community Development

Causes of Controversy

SLIDE 15

- Issues are complex, no easy answer.
- Many parties involved.
- Multi-jurisdictional.
- Differing data (too much, not enough) & interpretation.
- Differing values.
- Stakes are high.

Dealing with Controversy

SLIDE **16**

- Outgrow it.
- Reframe it to find common ground.
- Involve the community in research.

Outgrowing Controversy

SLIDE 17

All the greatest and most important problems in life are fundamentally insoluble. They can never be solved, but only outgrown. This outgrowing proves on further investigation to require a new level of consciousness. Some wider or higher interest appeared on the horizon and through the broadening of outlook the insoluble problem lost its urgency. It was not solved logically in its own terms but faded when confronted with a new and stronger life urge.

Carl Jung

Reframing the Issue

SLIDE **18**

How the issue is presented determines the possibility of finding coming ground.

How the problem is presented helps people see how they can work together.

Definition of Sustainable Development

SLIDE 21

“Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs. It contains within it two key concepts:”

- Needs
- Limitations

Definition of Sustainable Development

SLIDE 22

“From the human-centered perspective sustainable can be defined as the indefinite survival of the human species through the maintenance of basic life-support systems (air, water, land, biota), along with the infrastructure and institutions needed to protect the components of these systems. However, the broadest definition goes well beyond the merely biological to include the creation and indefinite maintenance of societies which are nourishing to self-actualizing persons and communities.”

Community Capitals Framework

SLIDE 24

The Community Capitals Framework developed by Cornelia and Jan Flora with Susan Fey (2004) is a useful tool to better understand the interconnectedness and interdependence of the various resources in a community.

Based on their research to uncover characteristics of entrepreneurial communities, they found the communities that were most successful in supporting healthy, sustainable community and economic development paid attention to all seven types of capital.

Community Capitals

SLIDE 25

“Capital is a type of asset that exists in any community. Capital assets may be tangible as industrial parks, businesses, and nature trails or intangible as with community norms related to helping one another, pride of heritage, or political influence. Capital assets can be invested, saved, or used up.”

Source: “Using Community Capitals to Develop Assets for Positive Community Change.” NCRCRD, 2/05, p. 4.

Example of Interactions

SLIDE 27

A large hog processing facility (built) moves into a rural community (political) providing jobs and adding to the county's tax base (financial). Water and sewer lines (built & political) are run from the nearby town to the facility. Water quality issues arose from the run-off of the facility and overflow of the sewer system (natural). Latino workers and families move into the community with educational needs (human). More money flows into the community (financial). A new restaurant opens (built). A local organization with many volunteers (social) initiates an "Old & New Settlers' program" (cultural).

Framing Will Determine How People View the Issues

SLIDE 28

“Frames are organizing principles that are socially shared and persistent over time, that work symbolically to meaningfully structure the social world.”

Stephen D. Reese, *Framing Public Life*, 2001.

Ways to Look at Framing Natural Resource Issues

SLIDE **31**

- Traditional linear approaches versus systems thinking
- Episodic versus thematic approaches
- Framing for action versus proclaiming disaster

Foundations
of
Practice

Community Development
Core Competencies
for Extension
Professionals in the
North Central Region
© 2005 NCRCRD

Traditional Linear Thinking

SLIDE 32

- Individual self interest will result in the betterment of society.
- Nature is to be conquered and her secrets expropriated for human use.
- Nature is a system of aggregate parts that function in a linear fashion.
- By breaking down the pieces of nature we can manage them for our use.
- Importance of competition to understanding change.

Foundations
of
Practice

Community Development
Core Competencies
for Extension
Professionals in the
North Central Region
© 2005 NCRCD

Systems Thinking

SLIDE

33

- Non-linear, non-reductionistic, non-mechanical view (sum of the parts is greater than the whole).
- Focus on interdependent and interactive relationships.

Episodic vs. Thematic – Framing for Responsibility

SLIDE 34

Episodic

- Presents a portrait
- Appears as random event
- Focuses on the story of a person
- Invokes the them of personal responsibility

Thematic

- Presents a landscape
- Details about trends
- Looks interaction of events- systems
- Invokes social or government responsibility

Strategies to Consider in Framing NR Issues

SLIDE **35**

- Link to trends versus focusing on specific events.
- Avoid invoking total disaster as a reason for action.
- Link opportunities for action to a community-based vision of the future.

Foundations
of
Practice

The Importance of Community Context

SLIDE **36**

- People with shared interests related to sharing the same location.
- Common attachment to locality with a degree of local autonomy.
- Share social interactions with one another with those beyond to satisfy requirements.
- Local community also interacts with larger society.
- Interacts with local environment and is shaped by local landscape.

Think Global, Act Local, Collaborate Regionally

SLIDE 37

Community development processes that:

- At the local level drive changes connected to sustainable development
- Act as catalysts for change at the state, regional, and national levels,
- Is a mechanism to empower people to act in their own interests and that of their community,
- Enhances potential as it dissolves barriers, and
- Is democratic.

Balance Requires...

SLIDE **38**

- Economic development in harmony with the productive capacity of the community as well as with the integrity of the environment in the long term as it accords community members human dignity and provides a sense of well-being.
- Citizen input and local control.

Community Challenge in Managing Natural Resources

SLIDE **39**

- Find the balance between competition, cooperation and coordination, so as to avoid competing with the very people who can help find sustainable solutions.
- The Triple Bottom Line:
 - Healthy Ecosystem
 - Vital Economy
 - Social Well-being

Sustainable Community Development – Key Concepts

SLIDE 40

- Community-directed process of organization, facilitation, and action that allows people to create the community in which they want to live.
- Values based.
- Ability to communicate and foster collaboration both within and outside the community.
- Requires sustained community action.

Questions for Reflection

SLIDE **46**

We each change personally as we grow in years and experience. So do our respective communities.

Each community that wishes to create a vision for a sustainable future must therefore ask of itself:

Questions for Reflection

SLIDE

47

- Who are we as a community today?
- What do we want our children to have as a legacy from our decisions?

How these questions are answered will determine the nonnegotiable constraints that set the overall direction of a community's vision and thus the legacy inherited by its children.

SLIDE **49**

Community Situational Analysis

April 18 and 19, 2006

1:30 to 3 p.m. CST (2:30 – 4 p.m. EST)

The ability to analyze a particular issue or situation in a community from a historical, political, cultural and community context and determine Extension's role in the issue is an important competency of community development.
