SLIDE 2

Anne Heinze Silvis

Anne Heinze Silvis
University of Illinois Extension
217-233-5126
asilvis@uiuc.edu

Anne is an Extension Specialist and is Director of the Laboratory for Community and Economic Development, Department of Human and Community Development at the University of Illinois at Urbana-Champaign. Her work focuses on leadership development, sustainable agriculture, and telecommunications and access in rural areas. Anne chairs the planning committee and hosts the annual Illinois conference for community leadership and directs funded projects in leadership development, community planning and sustainable agriculture. Anne is a graduate of the University of Wisconsin at Madison and earned an MBA from the College of Commerce at the University of Illinois. Anne serves as Vice-Chair of Rural Partners, the Illinois Rural Development Council and serves on the Advisory Board for the Peace Corps Fellows Program at Western Illinois University and as Co-Chair of the Communications Committee for the Community Development Society. Anne is a member of various committees and task forces for ACEES, University of Illinois Extension and the State of Illinois.

With thanks to Phil Alexander, Michigan State University Extension!

SLIDE 3

Learning Objectives

- Learn ways to conduct a situational analysis.
- Increase your level of understanding on how to link information from the analysis to decisions.
- Explore Extension's role based on current conditions and the community's level of preparedness.

Today's Agenda

SLIDE 4

1. Study a process you can use to conduct a situational analysis (and learn of additional resources).

2. Focus on developing an inclusive set of stakeholders to guide your analysis.

3. Based on your analysis, think about your role as an Extension Educator and the programs that you can provide to the community.

What is situational analysis?

SLIDE 5

- Developing a method to collect, analyze, and deliver information about current conditions, issues, problems, opportunities, and challenges facing stakeholders.
- Analyzing an issue or situation from a historical, political, cultural and community context.
- Using the resulting information to develop programs, priorities, and approaches.

Foundations of Practice
Community Development Core Competencies for Extension Professionals in the North Central Region

Why does it matter?

SLIDE 6

People support what they help to create.

Foundations of Practice
Community Development Core Competencies for Extension Professionals in the North Central Region
© 2005 NCRCD

Why it matters

SLIDE 7

"We are, of course, a nation of differences. Those differences don't make us weak. They're the source of our strength."

Jimmy Carter, 1976

Foundations of Practice
Community Development Core Competencies for Extension Professionals in the North Central Region
© 2005 NCRCD

Desired Outcomes

SLIDE 8

- Community partners understand the social, economic, and environmental processes affecting the community.
- Stakeholders are involved in decision-making.
- Extension programming is tailored to fit the needs of the community and the resources of Extension and its community partners.

Foundations of Practice

Seeing a bigger picture

SLIDE 9

"Issues such as health, education, social justice, economic development, housing, taxes, transportation, infrastructure, recreation or public safety cannot be dealt with separately from the environment in which they exist."

Practicing Community Development
Don and Doris Littrell, 2006.

Foundations of Practice

How do we know what we know?

SLIDE 10

It ain't what you don't know that gets you into trouble. It's what you know for sure that just ain't so.

The process

SLIDE 11

- ✓ Define the purpose of the situational analysis.
- ✓ List stakeholders; develop strategies to involve them.
- ✓ Explore existing data and identify information gaps.
- ✓ Decide how to collect and analyze additional information.
- ✓ Collect and analyze additional information.
- ✓ Report and make recommendations.
- ✓ Take action!

Foundations of Practice
Community Development Core Competencies for Extension Professionals in the North Central Region
© 2005 NCRCD

Situational analysis fits into the bigger picture of planning

SLIDE 12

- ✓ **Where are we now?**
(conducting situational analysis)
- ✓ **Where do we want to be?**
(developing a vision)
- ✓ **How do we get there?**
(designing an implementation plan)

Foundations of Practice
Community Development Core Competencies for Extension Professionals in the North Central Region

Define the purpose

SLIDE **13**

Big picture view such as a community profile.
or
Focus on a dimension, decision or issue such as:

- Land use
- Economic Development options
- Water Quality
- Health Care
- Attracting Retirees

Involved in community planning?

SLIDE **14**

How many of you have been involved in community planning?

- As a participant?
- As a facilitator?
- As a stakeholder of the community plan?
- Plan? What plan?

Foundations Practice
 Community Development
 Core Competencies
 for Extension
 Professionals in the
 North Central Region

Define your role

SLIDE **15**

- ❖ Convene the group?
- ❖ Provide expert advice?
- ❖ Provide information?
- ❖ Facilitate large groups?
- ❖ Work with planners?
- ❖ Participate?
- ❖ Write the report?

 © 2005 NCRCD

Define the stakeholders

SLIDE 18

Stakeholders are:

Any person, group or organization that can place a claim on an organization or community's attention, resources, or output; or is affected by that group.

Foundations of Practice
 Community Development Core Competencies for Extension Professionals in the North Central Region
 © 2005 NCRCD

Define the stakeholders

SLIDE **19**

Activity . . .
Brainstorm list of stakeholders for an Extension program or activity.

Sources of information

SLIDE **20**

Secondary data is existing data which has been collected, including U.S. census data, county based economic data, school district data, health department data, etc.

Primary data is information that you collect, including surveys, case studies, focus groups, interviews, pilot tests, observational studies, etc.

Foundations Practice
Community Development
Core Competencies
for Extension
Professionals in the
North Central Region
© 2005 NCRCD

Using secondary data

SLIDE **21**

If you use secondary data which was collected for a purpose other than your own, ask:

- Who collected the data and for what purpose?
- Does this data target or include our community?
- Did we find the most up-to-date source?
- Does this data match our units of measure, time frame, age groupings, etc.? If we compare this with other data, are we comparing apples with apples?
- Can we explain the numbers if someone asks?

Foundations Practice
Community Development
Core Competencies
for Extension
Professionals in the
North Central Region
© 2005 NCRCD

Using secondary data

SLIDE 22

Where are the information gaps?
 What do you need to know to address the issue?
 (as outlined in your first step, "define the purpose of the situational analysis")
 What information is missing?

Foundations of Practice
 Community Development
 Core Competencies
 for Extension
 Professionals in the
 North Central Region
 © 2005 NCRCD

Collecting primary data

SLIDE 23

Collecting and analyzing information . . . options:

- Survey
- Focus Groups
- Mapping
- Personal interviews
- Group process

Develop a budget and timetable for each option!

Foundations of Practice
 Community Development
 Core Competencies
 for Extension
 Professionals in the
 North Central Region
 © 2005 NCRCD

Collecting primary data

SLIDE 24

Surveys

- Define objective of survey (what do you need to know, and is a survey the right method?).
- Determine how you will define the population and contact the sample (mail? telephone? intercept?).
- Design questionnaire and sampling procedure (check with your institutional review board!).
- Compile data; analyze data.
- Write report with recommendations.
- Go to www.communitydevelopment.uiuc.edu, then go to the toolbox, then to "community surveys."

Foundations of Practice
 Community Development

Collecting primary data

SLIDE 25

Focus Groups

- Define objective (what do you need to know, and is a focus group the right method?).
- Determine how you will develop the groups (via a partner organization, usually).
- Design questions, identify and train the moderators, and set up the groups (check with your institutional review board!).
- Conduct focus group discussions; compile data; analyze data.
- Write report with recommendations.
- Go to www.extension.iastate.edu and search for the publication, *Focus Group Fundamentals*.

Foundations of Practice
Community Development Core Competencies for Extension Professionals in the North Central Region
© 2005 NCRCD

Collecting primary data

SLIDE 26

Mapping and personal interviews. . . .

- Using an asset-based approach to collecting information in a defined geographical area.
- Usually requires extensive volunteer input.
- Building Communities from the Inside Out, by John Kretzmann and John McKnight.
- Go to: <http://www.northwestern.edu>; Search for abcd (Asset Based Community Development)
- And the Southern Rural Development Center, www.srdc.msstate.edu and look under publications for: *Mapping the Assets of Your Community*.

Foundations of Practice
Community Development Core Competencies for Extension Professionals in the North Central Region
© 2005 NCRCD

**An Asset-based Approach
(is different from our usual assessment!)**

SLIDE 27

- An asset-based approach to development focuses on positives and strengths, rather than on problems and weaknesses.
- Using an asset-based approach to community assessment will influence the process of assessment, change the way people think about their community, and move control toward an internal, and away from an external, locus.
- Residents can use a system for identifying and developing assets which includes examining the people, institutions, and informal organizations in their community.

Collecting primary data

SLIDE 29

Using group process as a framework

- Visioning (see *Vision to Action* again)
- SWOT analysis
- “Do we have it”/“do we want it” Matrix
- Force field analysis
- Decision-making systems for large groups (future search, open space, etc.!!)

Goal Analysis

SLIDE 33

Goal:	
Forces that help us	Forces that hinder us

Foundations Practice
Community Development Core Competencies for Extension Professionals in the North Central Region
© 2005 NCRCD

Action Plan

SLIDE 34

Using the goal information:

- Brainstorm alternative actions,
- Set priorities,
- Allocate resources,
- Outline the action plan (including action, outcome, resources, deadline, and contact person).

Roles for Extension

SLIDE 35

- Convener
- Facilitator
- Resource Person / Information Provider
- Teacher / Educator
- Participant / Collaborator
- Other? (maybe no role)

Foundations Practice
Community Development
 Core Competencies
 for Extension
 Professionals in the
 North Central Region

Summary

SLIDE 36

- Situational analysis is a systematic method of collecting, analyzing, and delivering information about current conditions, issues, problems, opportunities, and challenges facing stakeholders within a community.
- Use the information to develop responsive, effective Extension programming.

Reflection Questions

SLIDE 37

Foundations Practice
Community Development Core Competencies for Extension Professionals in the North Central Region
© 2005 NCRCD

1. How do we understand what's really going on in a community? To whom do we listen? How do we obtain our information? What are our biases? Are we inclusive?
2. How do we determine the "right time" for an Extension program?
3. How do we assess risks? (Risks to ourselves? Extension? The community?)

Community Sustainability
May 7, 2008
1:30 to 3 p.m. CST

Jerry Hembd

The ability to understand the impact of decisions on the quality of natural resources and the long-term sustainability of the environment is an important component of community development.
