

CYFAR SCP Logic Model for North Carolina A&T State University Cooperative Extension Program

Identified Needs and Assets	Desired Results	Indicators	Activities	Resources
Food insecurity, hunger, lack of nutritious foods	<u>Short Term</u> Families begin growing vegetable gardens and produce food to eat	<u>Short Term</u> Number of families with gardens and value of produce grown	County Agents and Master Gardeners provide garden education	Cooperative Extension Hort. Agents and Specialists; Master Gardeners,/Volunteers
Childhood inactivity and overweight/obesity	Increased physical activity among family members, particularly youth	Number of youth agri-entrepreneurship projects and value of product	Community garden plots are made available to youth as after-school activity.	Diet and nutrition educators from NC Cooperative Extension (County and State); NC Division of Public Health/Physical Activity and Nutrition Branch
Poor dietary and nutrition habits	More nutritious meals with more diversity provided at home	Composition of family diets include more fruits and vegetables; Families preserve fruits and vegetables	Program staff teaches gardeners how to prepare and preserve produce grown in the garden. 'Meals in the Garden' series developed	EFNEP and other nutrition educators; County FCS Extension Agents/staff
Lack of productive opportunities for youth	4H Agri-Entrepreneurial "clubs" produce and market ag products	Youth receive money from selling produce	Volunteers trained and clubs formed to conduct projects	Volunteers; donations; 4H leaders; 4H agents; project funds
Parents failing to provide guidance, supervision, and role-modeling for children	Improved skills in parenting	Improved communication between parents and children; Parents gain knowledge about child development through parenting classes	Family days in the garden; Parenting skills education	Extension FCS staff; 'Parenting Matters' curriculum

<p>Lack of leadership and organization in communities</p>	<p>Volunteer leaders emerge and community garden organization developed</p>	<p>Organizational leadership of community gardens are assumed by gardeners; Gardeners participate in group activities such as pot-lucks and festivals</p> <p><u>Long Term Indicators</u></p> <p>Families have additional disposable income</p> <p>Families become capable of growing their own food</p> <p>Obesity and related illnesses decrease in families</p> <p>Families have healthier diets with increased fresh fruit and vegetable consumption</p> <p>Profitable businesses result</p> <p>Families communicate more successfully; Parents and children have more self-esteem and feel empowered: Conflict resolution skills in families increase and conflict is</p>	<p>Meet with agents and community stakeholders (housing, recreation, human services) and establish county teams; “Community Voices” instruction</p>	<p>Extension Community Development Specialists and Agents; Local partners: e.g. Food Banks, faith-based organizations, and other organizations with similar mission; Community Voices” curriculum</p>
---	---	--	---	---

		reduced Permanent leadership behaviors are established in participant population; Additional community-based family resource providers will be trained with the uniform curriculum and begin community gardens in their communities.
