

Stronger Economies Together

PURPOSE OF SET

Stronger Economies Together (SET) enables communities and counties in rural America to work together in developing and implementing an economic development blueprint for their multi-county region that strategically builds on the current and emerging economic strengths of that region.

Creating, attracting and retaining jobs as a single rural county in isolation from other nearby counties is becoming increasingly ineffective. In today's global marketplace, economic development progress is more likely to be realized when rural and metro counties work together as a region to assess their resource and then design and implement plans that build on their assets and comparative economic strengths.

Launched in 2010 by USDA Rural Development and the nation's four Regional Rural Development Centers and their land-grant university partners, this exciting initiative is now in place in more than 70 regions in 31 states.

BENEFITS OF SET:

- Step-by-step coaching to guide the design and implementation of a practical and viable regional economic development plan
- In-depth data tailored to the region, describing its current and emerging clusters, comparative economic advantages, and detailed demographic and socio-economic information
- Tools to uncover local assets and resources that can advance the region's economic strategies Technical assistance from Extension educators, USDA RD state staff, the Regional Rural Development Centers, and the Purdue Center for Regional Development to guide the initial stages of implementation of regional goals and strategies
