

## SITUATION STATEMENT

Looking back at the needs assessment, write a situation statement about the needs you have identified in relation to economic mobility and digital inclusion in your community. Try keeping your situation statement to 500 words or less. Consider these guiding questions:

- What is the community concern that could be addressed by advancing digital skills in the community?
- What causes the concern?
- For whom (individual, household, group, community, society in general) does this concern exist? Are certain groups more impacted than others?
- Who has a stake in the situation? Who cares whether it is addressed or not?
- What do we know about the people who are involved? What research and experience do we have?
